

# CHROMA/BLOCKOUT™ 750

## CHROMA/BLOCKOUT™ 750

Chroma/Blockout™ 750 is a heavy-duty, water-soluble liquid blockout designed for use on all mesh sizes. Chroma/Blockout 750 offers excellent coverage as well as biodegradability, very low toxicity and zero VOC's. Product is very durable and suitable for long running jobs. Can be used in conjunction with plastisol, UV, vinyl, conventional, solvent-based inks and more. When used with water-based inks, it is advisable to test product for durability on long runs.

### SPECIFICATIONS

Chroma/Blockout 750 is a red, viscous liquid. Product is totally water-based and therefore has zero VOC content. Refer to MSDS before use for safety information.

### INSTRUCTIONS FOR USE

Chroma/Blockout 750 can be used as is or thinned with water. Use a small plastic squeegee or card stock to apply the product around stencil edges or other areas to be blocked out. Use a small brush to touch up pinholes or other stencil imperfections. Air dry. Clean up with water after application. To remove from screen after job is completed, just pressure rinse with water. Keep containers closed tightly when not in use.
